State of Vermont Agency of Natural Resources Department of Environmental Conservation Notice of Determination of Eligibility for Categorical Exclusion

Killington Gateway I Water System, WSID #21207 Killington, VT Water System Improvements DWSRF Loan RF3-307

In accordance with Section VII of the Department's Environmental Review Procedures for projects funded through the Drinking Water State Revolving Fund (DWSRF) Program, the Killington Gateway I Water System, located in the Town of Killington, VT has requested its proposed water improvement project be evaluated for eligibility for a categorical exclusion exempting the project from detailed environmental procedures required for projects having a significant environmental impact.

The project consists of the replacement of a below-grade facility with a new booster pump system controlled by variable frequency drives, a new disinfection system, and a new water storage tank; standby power access also to be included.

Our consideration of the Killington Gateway I Condominium Association's request included reviewing environmental information and documentation completed and submitted by their engineering consultant, Otter Creek Engineering, Inc. At the completion of this independent evaluation, the Department has determined the project meets the criteria for receiving a Categorical Exclusion. The project will correct water system deficiencies and does not meet any of the criteria resulting in denial of an Exclusion.

Further information on the project and this determination are available for inspection by contacting the DWSRF Program at (802) 585-4905. In addition to the applicant, a copy of this determination will be sent to a list of stakeholders and posted on the Drinking Water and Groundwater Protection Division's website located at www.vermontdrinkingwater.org.
